POPE FRANCIS I TO BLESS HD FAMILIES IN ROME MAY 18

On the 4th anniversary for the election of Pope Francis I it was announced that he will meet and bless Huntington's Disease (HD) families from Latin America. The Meeting will take place in the Vatican on May 18. The entire HD community is invited to attend the papal blessing – held in a 7000 seat auditorium.

The Group who made this possible is a coalition of patient advocates who established www.HDdenomore.com – *Hidden No More*. "What I want him to say, in some way, is that the disease should not be hidden anymore," says gene carrier and global advocate Charles Sabine, one of the organizers. "That`s the theme of the event: that People should not feel any shame or stigma about the disease."

“

The disease should not be hidden anymore.
