EHDN celebrates HD Gratitude Day on March 23

As announced in the latest [EHDN Newsletter](#) March 23 is the anniversary of the discovery of the HD gene in 1993.

The day is celebrated as HD Gratitude Day to acknowledge and remember all members of HD families who made the gene discovery possible

through their dedicated donation of biosamples and data for multiple years.

The HD gene discovery has an effect on all of us, whether affected by HD or working on HD. Please join in by expressing your gratitude.

There are two important ways to contribute:

- Donation of money for the HD affected families in Venezuela, who contributed a lot of time, data and samples. Please see the article on page 2 in the [EHDN News 48](#).
- Share a photo of you and your team showing the H-hands gratitude day hand sign, tagged with #hdgratitudeday23 (on instagram) . Photos are displayed at: <https://factor-h.org/gratitude-day-23rd-of-mach>

On March 23, at 10.00 AM (US Eastern Summer Time, EST) a live stream of an event in Maracaibo, Venezuela will be available on the [Factor-H page](#).

Thank you,
